Rasht, Iran, Islamic Republic of

Profile

Dynamic Front-End Web Developer with hands-on experience in freelance projects since early 2024, focused on creating engaging user interfaces. Proficient in a range of technologies including HTML5, CSS3, and JavaScript, alongside frameworks such as Bootstrap and Tailwind. Committed to continuous improvement in both front-end and back-end development, aiming to contribute effectively to long-term projects while enhancing personal skills. Eager to engage in impactful work that not only fosters self-growth but also aids others in the community.

Employment History

FrontEnd Web Developer at Freelancer

01/2024—Present

In the role of FrontEnd Web Developer at Freelancer, the focus lies on crafting engaging web applications that are both visually appealing and highly functional. Utilizing technologies such as HTML5, CSS3, and JavaScript, the development of responsive designs ensures compatibility across various devices. This position also involves collaborating with clients to translate their requirements into dynamic user interfaces.

- Created and maintained interactive web applications that enhanced user engagement.
- Employed frameworks like Bootstrap and Tailwind to streamline the design process.
- Integrated best practices in coding for improved performance and maintainability.
- Engaged in continuous learning to stay abreast of the latest web technologies.
- Contributed to team discussions and project planning for effective project execution.
